

Driver LC 25W 350-600mA flexC T ADV

advanced in-track series

Product description

- Constant current / in-track LED Driver
- Optional accessory ACU ALU NIPPLE M10x1 for mounting the luminaire head
- Compatible 3P system in-tracks, see data sheet chapter 3.8
- For luminaires of protection class II
- Temperature protection as per EN 61347-2-13 C5e
- Adjustable output current between 350 and 600 mA via I-SELECT 2 plugs
- Max. output power 25 W
- Up to 84 % efficiency
- Nominal life-time up to 100,000 h
- 5-year guarantee

Housing properties

- Casing: polycarbonat, black, white or grey
- Type of protection IP20

Functions

- Overtemperature protection
- Overload protection
- Short-circuit protection
- No-load protection
- Burst protection voltage 2 kV
- Surge protection voltage 1 kV (L to N)

Typical applications

- For spot light in retail and hospitality application

Driver LC 25W 350-600mA flexC T ADV

advanced in-track series

Technical data

Rated supply voltage	220 – 240 V
AC voltage range	198 – 264 V
Max. input current (at 230 V, 50 Hz, full load)	0.139 A
Leakage current (at 230 V, 50 Hz, full load)	< 450 µA
Mains frequency	50 / 60 Hz
Overvoltage protection	320 V AC, 1 h
Max. input power	30.1 W
Typ. power consumption (at 230 V, 50 Hz, full load) ^①	29.7 W
Min. output power	4.2 W
Max. output power	25 W
Typ. efficiency (at 230 V / 50 Hz / full load) ^①	83 %
λ (at 230 V, 50 Hz, full load) ^①	0.95
Output current tolerance ^②	± 5 %
Max. output current peak ^③	≤ output current + 10 %
Max. output voltage (U-OUT)	60 V
THD (at 230 V, 50 Hz, full load) ^①	< 10 %
Output LF current ripple (< 120 Hz)	± 3 %
Starting time (at 230 V, 50 Hz, full load)	< 0.5 s
Turn off time (at 230 V, 50 Hz, full load)	≤ 0.01 s
Hold on time at power failure (output)	0 s
Ambient temperature ta (at life-time 50,000 h)	35 °C
Storage temperature ts	-40 ... +80 °C
Mains surge capability (between L - N)	1 kV
Life-time	up to 100,000 h
Dimensions L x W x H	230.8 x 31.9 x 42.7 mm

Black and white (87500787, 87500789)

Grey (87500904)

^① Test result at 600 mA.

^② Output current is mean value.

^③ Test result at 25 °C.

^④ Not compatible with I-SELECT (generation 1). Calculated resistor value.

^⑤ Device operates down to 4 V output voltage. It cannot be guaranteed that harmonics and EMI stay inside the limits. This has to be checked individually.

Product description

- Ready-for-use resistor to set output current value
- Compatible with LED Driver featuring I-SELECT 2 interface; not compatible with I-SELECT (generation 1)
- Resistor is base insulated
- Resistor power 0.25 W
- Current tolerance $\pm 2\%$ to nominal current value
- Compatible with LED Driver series PRE, EXC and ADV

Example of calculation

- $R [k\Omega] = 5 V / I_{out} [mA] \times 1000$
- E96 resistor value used
- Resistor value tolerance $\leq 1\%$; resistor power $\geq 0.1 W$; base insulation necessary
- When using a resistor value beyond the specified range, the output current will automatically be set to the minimum value (resistor value too big), respectively to the maximum value (resistor value too small)

1. Standards

EN 55015
EN 61000-3-2
EN 61000-3-3
EN 61347-1
EN 61347-2-13
EN 61547
EN 62384

1.1 Glow-wire test

according to EN 61347-1 with increased temperature of 850 °C passed (Black RAL9005/ White RAL9010).
according to EN 61347-1 with increased temperature of 750 °C passed (Grey RAL7035).

2. Thermal details and life-time

2.1 Expected life-time

Expected life-time

Type	ta	25 °C	35 °C
LC 25/350-600/42 flexC T ADV	Life-time	100,000 h	50,000 h

[®] Test result at max. output voltage.

The LED Drivers are designed for a life-time stated above under reference conditions and with a failure probability of less than 10 %.

3. Installation / wiring

3.1 Circuit diagram

3.2 Wiring type and cross section

The wiring can be in stranded wires with ferrules or solid with a cross section of 0.2–0.5 mm². Strip 8.5–9.5 mm of insulation from the cables to ensure perfect operation of the push-wire terminals.
Use one wire for each terminal connector only.

wire preparation:
0.2 – 0.5 mm²

3.3 Release of the wiring

Press down the “push button” and remove the cable from front.

3.4 Fixing conditions

Dry, acidfree, oilfree, fatfree. It is not allowed to exceed the maximum ambient temperature (ta) stated on the device.

3.5 Wiring guidelines

- All connections must be kept as short as possible to ensure good EMI behaviour.
- Max. length of output wires is 20 cm.
- Secondary switching is not permitted.
- Incorrect wiring can damage LED modules.
- To avoid the damage of the Driver, the wiring must be protected against short circuits to earth (sharp edged metal parts, metal cable clips, louver, etc.).

3.6 Replace LED module

1. Mains off
2. Remove LED module
3. Wait for 10 seconds
4. Connect LED module again

Hot plug-in or secondary switching of LEDs is not permitted and may cause a very high current to the LEDs.

3.7 Mounting luminaire

Max. allowed weight of complete luminaire: 5 kg (50 N).
This is valid for horizontal mounting of track system only.
For vertical installation please contact Tridonic for clarification.

3.8 Compatible tracks

Subject to be changed without notice.

ERCO	783...	3P	Black, grey
SIDE	25101	3P	Black, grey
PHILIPS	RCS350 3C	3P	Black, grey
FOSNOVA	OMNITRACK	3P	Black, grey
Stucchi	One track	3P	Black, white, grey
Powergear	PRO-0610	3P	Black, grey
Unipro	T32W	3P	Black, grey
Unipro	T32FW	3P	Black, grey

Tests have been done with in-tracks taken from the market in the first half of 2020.

Tridonic has no control or responsibility on any future or past possible changes made by different manufactures that could affect the compatibility between tracks and adapters.

3.9 Adapter mounting into the track

Insert the adapter into the track, so that the mechanical key (A) in the adaptor matches the groove (B) in the track. Rotate of about 90° the lever of the cam (C) until it reaches the locking position.

To open rotate the lever the opposite direction.

3.10 Phase selection

When the track is connected to a three-phase system it is possible to select the phase (L1, L2 or L3) to distribute the single luminaires in the system, by means of the proper selector (A) of the adaptor.

4. Electrical values

4.1 Operating window

Device operates down to 4 V output voltage. It cannot be guaranteed that harmonics and EMI stay inside the limits. This has to be checked individually.

4.2 Efficiency vs load

4.3 Power factor vs load

4.4 Input power vs load

4.5 Input current vs load

4.6 THD vs load

THD without harmonic < 5 mA (0.6 %) of the input current:

4.7 Maximum loading of automatic circuit breakers in relation to inrush current

Automatic circuit breaker type	C10	C13	C16	C20	B10	B13	B16	B20	Inrush current	
Installation Ø	1.5 mm ²	1.5 mm ²	1.5 mm ²	2.5 mm ²	1.5 mm ²	1.5 mm ²	1.5 mm ²	2.5 mm ²	I _{max}	Time
LC 25/350-600/42 flexC T-B ADV	58	76	94	117	58	76	94	117	8 A	80 µs

These are max. values calculated out of continuous current running the device on full load.

There is no limitation due to inrush current.

If load is smaller than full load for calculation only continuous current has to be considered.

4.8 Harmonic distortion in the mains supply (at 230 V / 50 Hz and full load) in %

	THD	3.	5.	7.	9.	11.
LC 25/350-600/42 flexC T-B ADV	< 9	< 7	< 5	< 4	< 1	< 2

Acc. to 6100-3-2. Harmonics < 5 mA or < 0.6 % (whatever is greater) of the input current are not considered for calculation of THD.

5. Functions

5.1 Short-circuit behaviour

In case of a short circuit on the secondary side (LED) the LED Driver switches off. After elimination of the short-circuit fault the LED Driver will recover automatically.

5.2 No-load operation

The LED Driver works in burst working mode to provide a constant output voltage regulation which allows the application to be able to work safely when LED string opens due to a failure.

5.3 Overload protection

If the output voltage range is exceeded, the LED Driver will protect itself and LED may flicker. After elimination of the overload the nominal operation will recover automatically.

5.4 Overtemperature protection

The LED Driver is protected against temporary thermal overheating.

If the temperature limit is exceeded the LED Driver will switch off.

It restarts automatically.

The temperature protection is activated above $t_{c\ max}$.

5.5 Function: adjustable current

The output current of the LED Driver can be adjusted in a certain range.

I-SELECT 2

By inserting a suitable resistor or third party resistor into the I-SELECT 2 interface, the current value can be adjusted. The relationship between output current and resistor value can be found in the chapter

“Accessories I-SELECT 2 Plugs”.

Please note that the resistor values for I-SELECT 2 are not compatible with I-SELECT (generation 1). Installation of an incorrect resistor may cause irreparable damage to the LED module(s).

Resistors for the main output current values can be ordered from Tridonic (see accessories).

6. Miscellaneous

6.1 Insulation and electric strength testing of luminaires

Electronic devices can be damaged by high voltage. This has to be considered during the routine testing of the luminaires in production.

According to IEC 60598-1 Annex Q (informative only!) or ENEC 303-Annex A, each luminaire should be submitted to an insulation test with 500 V_{DC} for 1 second. This test voltage should be connected between the interconnected phase and neutral terminals and the earth terminal.

The insulation resistance must be at least 2 MΩ.

As an alternative, IEC 60598-1 Annex Q describes a test of the electrical strength with 1500 V_{AC} (or 1.414 x 1500 V_{DC}). To avoid damage to the electronic devices this test must not be conducted.

6.2 Conditions of use and storage

Humidity: 5 % up to max. 85 %,
not condensed
(max. 56 days/year at 85 %)

Storage temperature: -40 °C up to max. +80 °C

The devices have to be within the specified temperature range (t_a) before they can be operated.

6.3 Maximum number of switching cycles

All LED Driver are tested with 50,000 switching cycles.

The actually achieved number of switching cycles is significantly higher.

6.4 Additional information

Additional technical information at www.tridonic.com → Technical Data

Guarantee conditions at www.tridonic.com → Services

Life-time declarations are informative and represent no warranty claim.

No warranty if device was opened.
